

David Marquez

Software Engineer | Java Backend & Distributed Systems

Argentina · Remote | davidarielmarquez@outlook.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building backend and full-stack solutions in the financial sector. Specialized in Java, Spring Boot and Quarkus, with hands-on experience in REST APIs, microservices and asynchronous workflows using Apache Kafka and AWS SQS. Experienced in Spring-to-Quarkus migrations, OAuth2/JWT security, relational databases, automated testing and CI/CD environments. Professional Vue.js experience, practical React experience, and English B2+.

PROFESSIONAL EXPERIENCE

Banco Macro - Software Engineer

Sep 2025 - Present

- Develop REST APIs for Cash Management workflows using Java 21 and Spring Boot 3.x.
- Implement asynchronous workflows as both producer and consumer with AWS SQS within an established microservices architecture.
- Implement service security with JWT and OAuth2 Client Credentials; document APIs with Swagger/OpenAPI.
- Maintain automated tests with JUnit and Mockito; work with PostgreSQL, Git/Bitbucket, Jenkins-based delivery and OpenShift environments.
- Deliver features from refinement through implementation, testing and bug fixing.

Banco Hipotecario - Software Developer

Jan 2025 - Jun 2025

- Migrated multiple backend microservices from Spring to Quarkus, taking ownership of complete services assigned to me.
- Adapted dependencies and application logic while preserving existing business behavior.
- Created and adapted JUnit/Mockito tests; participated in delivery through JIRA, Jenkins pipelines and OpenShift validation.
- Maintained Java APIs and resolved defects identified during testing.

FLEX TECH ARG - Software Developer

Oct 2024 - Dec 2024

- Co-developed from scratch an internal reusable Java authentication library consumed by banking applications.
- Implemented authentication functionality and secure credential encryption/handling.
- Developed JUnit/Mockito tests and delivered features end-to-end with a senior developer.

BYMA - Caja de Valores - Software Developer

Oct 2022 - Oct 2024

- Contributed to the modernization of a Spring monolith into a Quarkus microservices architecture defined by the technical team.
- Developed backend functionality for financial operations and portfolio management using Java, Quarkus and REST APIs.
- Implemented Kafka producers and consumers for asynchronous transactional message routing between services.
- Worked with Oracle SQL, Hibernate and Panache; built substantial Vue.js functionality including tables, filters, authentication flows and complete sections.
- Delivered features end-to-end across backend and frontend components.

TECHNICAL SKILLS

Backend: Java 11/17/21, Spring Boot 3.x, Quarkus, REST APIs, JPA, Hibernate, Panache

Distributed Systems: Microservices, Apache Kafka, AWS SQS, Event-Driven Systems

Data / Security: PostgreSQL, Oracle, SQL, OAuth2, JWT, Swagger/OpenAPI

Testing / Delivery: JUnit, Mockito, Postman, Git, Bitbucket, Jenkins, JIRA, Scrum, OpenShift environments

Frontend: Vue.js, JavaScript, HTML, CSS

Additional familiarity: React, Docker, Kubernetes, AWS S3, DynamoDB, MySQL, Nginx

EDUCATION & LEARNING

Westminster School of Languages - English B2+ | **Global Mentoring - Ubaldo Acosta** - Java | **Platzi** - Java SE, Vue.js, React
